

## Rescue / Space Blanket

Product Code: BE-RSB

Dedicated to bring you, Tried & Tested...  
Tactical, Personal Safety Products & Services

### Product Specifications:

The rescue / space blanket is an especially low-weight, low-bulk blanket made of heat-reflective thin plastic sheeting. In their principal usage, space blankets are included in many emergency, first aid, and survival kits because they are usually waterproof and windproof. That, along with their low weight and ability to pack into a small space.

Included this in your first aid kits and in camping equipment. Lost campers and hikers have an additional possible benefit: the metallic surface appearance flashes in the sun, allowing use as an improvised distress beacon for searchers and as a method of signalling over long distances to other people on the same route as the person who owns the blanket.
